

Patterns are all around us. Patterns exist in nature and some patterns are created by humans. Pattern is an arrangement of repeated shapes or parts. Pattern usually gives a decorative design.

Complete the following exercise on a page with your name and date clearly visible.

1. Draw a simple geometric shape.

2. Repeat the shape six times until it forms a pattern.

3. In the spaces below create an interesting pattern using shape. Each pattern should be different.

- A pattern using round/curved shapes.

- A pattern using angular shapes.

- A pattern using both curved and angular shapes.
