

Life Skills Gr 3 Memo Week 2

Insects:

1. Ants can only live a few months without their queen.
2. Flies have a long tongue which sucks up food like a straw.
3. Animals such as birds, frogs and snakes will enjoy eating flies as a tasty dinner.
4. Lots of ants who live together are called colonies or groups.
5. The four lifecycle parts of a butterfly is the egg, the larva, the pupa and an adult.
6. Butterflies like to hibernate in winter.
7. Bees use their honey to feed their young and to have something to eat in winter.
8. You will find the queen bee, the worker bees and the drones in a colony of bees.
9. Flies have two wings and butterflies have four wings.
10. The three parts of an insects body are the thorax, abdomen and the head.
11. An insect has 3 pairs of legs.
12. A spider has 8 legs and not 6 and it has 2 body parts and not 3, therefore it is not an insect.
