MEMO- WEEK2- WORKSHEET 2

SORTING AND RECYCLING OF WASTE MATERIALS PGS. 90-

93. *NB: this section continues from week2- worksheet 1.

Every person has the responsibility of disposing of waste correctly.

1. How can this be done?
 - a. Reduce waste- buy products with less packaging. Reuse what you can. Recycle materials that you can easily recycle and them to a depot. Make sure waste is rinsed and sorted before you recycle it. Dispose of batteries and other electronic components in an appropriate way. Always throw litter away in bins and pick up litter when you see it laying around.
2. What are some of the items that you can recycle?
 - a. Glass, paper, cardboard and Plastic.
 - b. Does your family recycle and what do they do with household waste?
*Own answer
 - c. What is organic waste?
 - a. Waste that come from living organisms- plants and animals. It includes dead plant and animal matter. Animal and human waste as well as vegetable peelings.
 - d. Do you have a compost heap at home or have you seen one? Describe it here.
*own answer.
