

Let-ter-gre-pe

(Syllable)

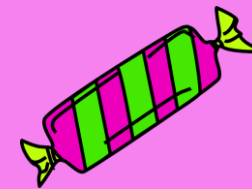

Lettergrepe is die klankdele waarin woorde verdeel word.
(Words can be broken up into syllables)

Daar word onderskei tussen OOP en GESLOTE lettergrepe.
(There are OPEN and CLOSED syllables)

Daar is sekere reëls wat ons moet volg wanneer ons 'n woord in lettergrepe verdeel.
(There are certain rules we must follow when we break a word up in syllables)

Kom ons kyk na 'n paar maklike voorbeelde.
(Let's look at a few easy examples)

lekker = lek - ker

krokodil = kro - ko - dil

tafel = ta - fel

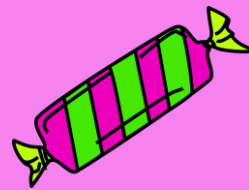

Lettergrepe kan OOP of GESLOTE wees.
(Syllables can be OPEN or CLOSED)

When the <u>last letter</u> of the syllable ends on a VOWEL it is OPEN	When the <u>last letter</u> of the syllable ends on a CONSONANT it is CLOSED
oop 	geslote 

Kom ons kyk weer na 'n paar maklike voorbeelde.
(Let's look again at a few easy examples)

lekker = lekg - kerg

krokodil = krog - kog - dilg

tafel = tag - felg
