

MEMO**UNIT: WHOLE NUMBERS****WEEK: 3****TOPIC: ADDITION****DATE: 04/05/2020**

1. Calculate the answers to the following problems.

Show all your working out.

a. Jose sold 1 456 apples and 2 510 oranges. How many pieces of fruit did he sell altogether?

$$1\,456 + 2\,510 = \square$$

$$1\,456 + 2\,510 = 3\,966$$

Therefore he sold 3 966 fruits altogether.

b. Leon bought a cricket bag for R1 599 and a smartwatch for R 1 099. What is the total sum of the money?

$$1\,599 + 1\,099 = \square$$

$$1\,599 + 1\,099 = 2\,698$$

Therefore the total sum of the money is R2 698.

c. There were 3 152 trees planted from January-June in the year 2 019. In the same year, 5 622 trees were planted from July-December. How many trees were planted in total?

$$5\,622 + 3\,152 = \square$$

$$5\,622 + 3\,152 = 8\,774$$

Therefore 8 774 trees were planted altogether.

d. The media centre lent out 1 125 books in the first half of the year. That number increased by 1 038 in the second half of the year. How many books were issued by the end of the year?

$$1\,125 + 1\,038 = \square$$

$$1\,125 + 1\,038 = 2\,163$$

Therefore 2 163 books were issued altogether.

e. Two teams are competing against each other in skipping. Team A completes 2 412 skips and team B completes 1 784. What is the combined number of skips?

$$2\,412 + 1\,784 = \square$$

$$2\,412 + 1\,784 = 4\,196$$

Therefore the combined number of skips is 4 196.
