

WATERKLOOF PRIMARY SCHOOL

Natural Science and Technology Grade 5 Term 2 2020

MEMO for TEXTBOOK Activity 2 p62

1. Fig 7 the Rhino from Mapungubwe, the silver ring, the aluminium container could all have been hammered into shape as the metals are malleable.
2. The aluminium container and the gold covering of the rhino are thin sheets of metal.
3. The silver ring and the golden rhino are shiny – they look attractive.
4. Electric wires have to conduct electricity so they must be made of metal. Blades of knives or scissors would not cut well if they were not made of metal.
